

Perimaliter® Wallpacks

Perimaliter III PVL3 / PGM3 • Perimaliter II PGL

Solutions for Perimeter/Area Lighting

Perimaliter® Wallpacks

The Perimaliter wallpack has been the design leader in refractor wallpacks for the past 20 years. The construction, optical characteristics and quality manufacture make the Hubbell Perimaliter the most desired refractor solution for perimeter/area lighting from a wall mount. Perimaliter III PVL3 and PGM3 features:

Energy-Saving LED

- LED units provide 60-70% energy savings over traditional wallpack systems producing up to 128LPW (lumens per watt)
- PVL3 LED and PGM3 LED uses only 32w (350mA) or 72w (700mA)
- Lateral spread allows typical spacing of three to four times mounting height with excellent uniformity
- PGM Produces over 4100 lumens out of the fixture at nominal 5000K with asymmetric distribution for typical mounting heights of 10-15 feet
- Available in 4000K and 5000K color temperature

Wire Access

- UL required 1.75" minimum back opening for wiring access and inspection
- Side 1/2" hubs for feed thru surface conduit
- Top 1/2" hub for conduit or button photo control

Refractor Selection

- Vandal resistant polycarbonate (PVL)
- Borosilicate glass (PGL)

Perimaliter® III PVL3

Vandal Resistant – High Performance Wallpack

Refractor/Door Assembly

- One-piece injection molded UV stabilized polycarbonate
- Energy-saving LED and HID systems up to 150w
- Sharp prism design – Distributes lumens at exact angles, engineered for spacings up to 6 times mounting height
- Dark Bronze finish is painted on inside of door so projectile impacts will not mar the appearance
- Four point door compression provides seal against moisture and insects, certified for wet locations
- HubbellGard™ fasteners have external coating to prevent chemical interaction in the cast aluminum housing, allows easy service and eliminates screw "Freezing" or "Bonding"
- New improved bottom hinges have been strengthened for durability and years of maintenance-free operation

LED System

A thirty LED light engine produces over 4100 lumens at 5000K with asymmetric distribution. Optional 10KA surge protection available as an option.

Polycarbonate Refractor

One-piece front, impact resistant, sharp prism performance.

Heavy Duty Hinges

NEW – Two-piece hinge design provides increased strength – resists shipping/installation/maintenance damage.

1/2" Conduit Hubs

1/2" tapped hubs with gasketed plug. PVL3 and PGM3 feature two side hubs and one top hub for superior access.

Lighting Distribution

- Vertical HID lamp reduces "Hot spot" beneath fixture and provides more lateral lumens for better uniformity
- Wide lateral spacing allows less fixtures to be installed or provides greater light levels and uniformity from closer mounting locations

Results

- Vertical illumination fills application space, increasing pedestrian perception of safety and security
- Eliminates dark walls and "hiding" places

Certified

- Listed to UL1598 for use in wet locations

Perimaliter® III PGM3

Glass Refractor Wallpack for Wide Spacing Applications Refractor/Door Assembly

- Borosilicate glass refractor, non-yellowing
- Energy-saving LED and HID systems up to 250w
- Engineered for spacings up to 6 times mounting heights
- Glass is silicone sealed to die-cast aluminum door
- 800 series polyester powder paint provides rugged, lasting appearance; Multiple finish selections available
- Four point door compression closure provides seal against moisture and insects, certified for wet locations
- HubbellGard™ fasteners have external coating to prevent chemical interaction on the cast aluminum housing, allows easy service while eliminating screw "Freezing" or "Bonding"
- Robust bottom hinges for durability and years of maintenance free operation

Button Photo Control Accessory

Top hub makes PBT Photo control installation easy.

Secure Mounting

Two back knockouts 9" on center for rigid installation. 1.75" rear wire access with grommet.

Borosilicate Glass Refractor

Heat resistant, non-yellowing prism design for wide spacing.

Ballast Assembly (HID only)

Identification and electrical data clearly presented on ballast cover inside fixture door. Medium base-up socket provides maximum light output, life and uniformity.

Perimaliter® II PGL

Large application PGL, heavy-duty rugged design. Powered by Pulse-Start for energy savings

The **PGL** family provides higher wattage systems for typical mounting heights of 20-30 feet. This series has many of the same features as the smaller Perimaliter III series and shares the same door and borosilicate glass refractor with the **PGM3**. The housing is nearly 2" deeper to accommodate the higher wattage ballast systems.

Wiring Access

The **PGL** has the same 1/2" wiring hubs on each side but the PBT button photo control hub is located on the left side (as you face the unit).

Optics

All sockets are vertical, mogul base.

Systems

PGL is available in 250w and 350w PSMH

Isolated Ballast Components

PGL Vertical Lamp Optics

Borosilicate Glass Refractor

PGL PC/Conduit Hubs

Typical Photometrics – 150 PSMH at 15 feet

Vertical Lamp Perimaliter® – Wide lateral spacings 6 times mounting height for 1 FC minimum between fixtures

Horizontal Lamp Wallpack – Mostly forward throw 4 times mounting height spacing for 1FC minimum between fixtures

Perimaliter® III PVL3

- One-piece removable polycarbonate lens/door assembly, internally painted for lasting appearance
- 6-to-1 spacing to mounting height ratio; Two HubbellGard® fasteners provide weathertight seal to housing
- Die-cast aluminum housing for rugged mounting and heat dissipation; 1/2" feed-thru hubs and top photo control hub provided for field installations; standard mount over recessed wiring boxes
- Specular reflector, vertical lamp and refractor combine for efficient and uniform perimeter lighting
- Energy-saving LED and HID systems
- For HID socket is porcelain medium base with spring-loaded center contact
- Listed to UL 1598 for use in wet locations
