The Proof Is In The Performance**

- Durability
- Protection from Corrosion, UV and Environmental Damage
- Widest Available Diversity of Enclosures
- Cost Effectiveness

FAILURE
Non-Stahlin Enclosure

SUCCESS
Stahlin Non-Metallic Enclosure

Stahlin Non-Metallic Enclosures provides you the most frequently specified non-metallic electrical enclosures in the world, balancing appealing aesthetics with stringent physical property performance standards including NEMA 4X and NEMA 6P integrity. All Stahlin non-metallic enclosures are protected by patented SolarGuard® --- a unique double-protection material formulation that provides superior molded-in UV-resistance, requires no field maintenance, and is provided at no additional product cost.

Our enclosures will protect your electrical components, measurement equipment, and sensitive instrumentation from the damaging environmental factors, corrosion and impact.

We're so sure of this that we back it with our **SUN-UP-TO-SUN-DOWN** decade-long product warranty against manufacturer's defects!*

With Stahlin Non-Metallic Enclosures you get the protection you paid for.
